THEN NATURE TOOK A HAND

\$200,000,000 COST OF COAST STRIKE

CANADIANS WIN AT BISLEY MEET

WASHINGTON—Nature, stepping in as an unwelcome assistant to the United States government's crop reducing program, has made it impossible to go a goal or two. A survey on July 21 showed that the figures aimed at in the five major divisions—wheat, corn, cotton, tobacco and sugar—either have been virtually reached or surpassed.

Drought, insects and floods gave the reduction drive a mighty but unwanted shove along its course.

It has become apparent to directors of the plan that some surprises they regarded as obvious a year ago would be needed to avoid shortages this year.

SAN FRANCISCO—The loss to business and commerce from the Pacific Coast strike, exclusive of San Francisco area general walkouts, since the longshoremen quit May 8, exceeds the sum of \$200,000,000, estimates obtained by the Associated Press indicated.

Industrial organizations in San Francisco and Seattle asserted that conservative surveys indicated that each port has lost \$1,000,000 a day during the 74 days of the strike. The loss to the state of Oregon was declared to be at least \$200,000,000.

BISLEY CAMP, Eng.—Shary shooting Canadians on Friday added the historic Kolopole Challenge Cup to the MacKinnon Cup, making a clean sweep in the two great team trophies of the Imperial meeting of the National Rifle Association.

The Canadians, sweeping irresistibly towards the climax of the big meet, recovered the challenge cup from the mother country which had taken it from Canada last year. It was the 14th win for the Canadians since the match was first fired back in 1871.

STOMACH GAS RUINS HEALTH AND BEAUTY

Stomach gas that causes loss of sleep and rest ruins your health and your beauty! Even people who have suffered for years from stomach troubles caused by acid stomach are getting relief from Bismarck, a new delicious-tasting antacid powder. Bismarck brings lasting relief. You'll get it today at McKibbin's Retail Drug Store.

The dog, says a dog lover, often finds an aching foot. This is especially true of the hot dog.

LOCAL TRUCKS NOT GIVEN PREFERENCE IN GRAVELLING

From Drumheller comes the report that indignation has been aroused among truck owners and other business men of the district over the provincial government's action in letting graveling contracts to contractors, without clauses to the effect that wherever possible local trucks must be used and supplies purchased with. In the district being traversed by the highway being gravelled or constructed, the matter reached a climax when a Fishbury contractor arrived in the Drumheller area recently to commence graveling the Drumheller-Fishbury section of the Drumheller-Calgary highway.

P. C. Moyer, M.L.A. for Drumheller, will take the matter up with Hon. J. J. McCallan, now minister of Public Works.

MACMILLAN-BROWNLEE CASE WILL BE APPEALED IN FALL

Notice of appeal against the verdict of Mr. Justice Ives in the Brownlee-Macmillan civil action which alleged seduction was filed in Edmonton on Friday last by Neil D. MacLean, K.C., counsel for the plaintiffs, A.C. Macmillan and his daughter Miss Vivian Macmillan, of Edson.

The appeal will be taken to the Appellate Division of the Supreme Court of Alberta.

In handing down his decision reversing the jury's verdict, Mr. Justice Ives dismissed the damages of \$15,000 awarded to the plaintiffs.

Legal separate grounds are stated in the notice of appeal. Counsel for the appellants contend that no evidence respecting damage is necessary by reason of the provisions of the statute dealing with seduction passed in 1922.

It is also contended that the trial judge erred in dismissing the action after instructing the jury that damages might be assessed if it was found that the plaintiff had been seduced and that in finding there had been no illness from the seduction the trial judge was also in error.

The appeal fund which is being subscribed by citizens to have the case brought to appeal has reached the two thousand dollar mark and is gradually being increased, thus assuring ample funds to bring justice to the front if any wrong has been committed.

"But mamma, I can't see that sister is gaining in weight, can't you?" remarked Robert at the breakfast table. "Why, what are you talking about son?" asked his mother.

"When they were sitting on the front porch last night, I heard her say he had been. 'Ain't I getting heavier'?"

Large Increase in Canadian Exports for Month June

Ottawa—Canadian exports in June increased \$1,020,000 from the same month a year ago, due largely to expanding requirements of British Empire countries markets, the Dominion Bureau of Statistics announced last Thursday.

Whisky exports to the United Kingdom in June totalled \$350,000 as compared with \$240,000 in the same period a year ago. Total whisky exports for the month were \$420,000 as compared with \$210,000 last year.

The value of wheat exports in June increased to \$14,367,000 from \$11,951,000. Other increases in the total value of commodities exported during June were:

Rubber, including tires and foot wear \$1,020,000 from \$530,000; vegetables, \$222,000 from \$231,000; fruits \$14,000 from \$10,000.

Cattle exports rose from \$363,000 to \$475,000, most of the animals going as usual to the United Kingdom.

There was also a large increase in fish from \$1,726,000 to \$1,819,000, the United States and Great Britain being the large buyers.

Meats increased from \$1,143,000 to \$2,095,000, almost all of this going to the British market; unmanufactured leather from \$231,000 to \$250,000; wool from \$100,000 to \$200,000.

Paper exports, principally newsprint increased from \$7,963,000 to \$12,775,000, most of it going to the United States.

Planks and boards from \$1,608,000 to \$2,475,000, the increase to the United Kingdom alone being \$550,000; pulpwood from \$230,000 to \$250,000; wood pulp from \$1,804,000 to \$2,116,000.

The export of automobiles increased from \$1,015,000 to \$1,123,000, the increase to the United Kingdom was from \$119,000 to \$211,000; auto parts from \$2,200 to \$1,936,000; farm implements from \$192,000 to \$267,000; hardware and cutlery from \$75,000 to \$164,000; machinery from \$194,000 to \$418,000; aluminum from \$172,000 to over \$1,200,000; copper \$1,194,000 to \$1,772,000.

The export of copper to Great Britain increased from \$654,000 to \$1,224,000. Lead remained stationary at \$756,000, but asbestos rose from \$388,000 to \$446,000; coal from \$2,020 to \$197,000; petroleum and products from \$94,000 to \$244,000; stone from \$222,000 to \$509,000; soda ash from \$200,000 to \$259,000 to \$1,131,000.

The export of electricity to the United States increased from \$197,000 to \$240,000. There was another increase in the call for Canadian films from \$337,000 to \$361,000.

SEVENTH BANK OF MONTREAL CROP REPORT

General—Crops over most of Alberta and the northern areas of Saskatchewan and Manitoba at July 19th continue to make favourable progress but the dry hot weather of the past week and grasshoppers have caused further deterioration of the southern areas of Saskatchewan and Manitoba. Hail damage has been serious in limited areas of Saskatchewan and Alberta. In the Province of Quebec crops as a whole present a good appearance and have responded well to satisfactory weather conditions. In Ontario general rains during the past week have benefited all grain and root crops although more moisture is needed in the south-western section of the province where precipitation to date has been inadequate. In the Maritime Provinces grain and root crops have withstood a hot dry spell and are still in good condition but rain is needed. In British Columbia crops continue to mature several weeks earlier than usual.

Northeastern Alberta—Wheat is mostly headed, coarse grains are growing rapidly. There has been some hail damage.

Southeastern Area—Crops are progressing satisfactorily but rain is not needed in some sections. Grasshoppers are active but damage has not been serious.

Western Alberta—Crops are making good headway under ideal growing conditions. Hail damage has been serious in the Red Deer area. Pastures are in good condition. A good yield of sugar beets is indicated.

Singlene—When I marry, I'm going to lay down the law to my wife."

Benedit—Possibly so, but you'll accept all her amendments."

DILLINGER SHOT AS HE LEFT THE THEATRE IN CHICAGO

CHICAGO—John Dillinger, United States' most noted bandit and killer, was shot to death on Monday night as he left a downtown theatre. The police were tipped off that the noted gangster was a patron of the theatre and surrounded the place. When Dillinger came out of the theatre he sensed a plot and reached for his gun, but a fusillade of bullets from four men dropped him in his tracks. Many people saw the slaying of the criminal, and so greatly were they for his conviction that they flung handkerchiefs in his blood as a last remembrance.

Dillinger had greatly changed his appearance in the hope that he would not be recognized, but he could not fool the eyes of the police. His hair was dyed a darker hue, scars on his cheeks had been lifted by plastic surgery, gold rimmed spectacles framed his shifty eyes, his nose straightened, a black moustache, and the slinks of his fingerprints obliterated by acid.

WEDDINGS

SELLENS-NASH

A lovely July wedding took place at Christ Church, Carbon, at 2:30 o'clock on Sunday, July 22nd, when Irene Frances, youngest daughter of Mr. and Mrs. C. H. Nash, Carbon, and Mr. Charles Edmund Sellen, formerly of Carbon and now of Carstairs, were united in the holy bonds of matrimony by the Rev. Robert Aton, of Drumheller.

The bride entered the church on the arm of her father, who gave her in marriage. She looked charming in her bridal gown of heavy white satin fastened on princess lines, with lace collar and veil caught about her head with orange blossoms. She carried a bouquet of white roses. Miss Daphne Nash, her only sister, acted as bridesmaid and was dressed in pale green organdy, carrying a bouquet of gladioli. Little Irene Wilson, dressed in pink organdy, was flower girl. The room was attended by Mr. William Edwards of Drumheller.

During the signing of the register Miss Grace Cameron sang, with organ accompaniment by Miss Kathleen Watkins.

The church was prettily decorated for the occasion, while almost one hundred invited guests attended the ceremony. Messrs. Corrie Peterson and Norman Nash acted as ushers.

Following the ceremony a reception was held at the home of Mr. and Mrs. C. H. Nash. A very dainty lunch was served with Mrs. H. C. Wilson and Mrs. L. G. McQuade presiding at the tea table.

Later the bride and groom left by motor amid showers of rice and confetti, for Pacific Coast points and on returning will reside at Carstairs, where the groom is employed by the Bank of Montreal.

The bride's travelling costume was a smart blue silk suit with white accessories.

GRISDALE URGES CROP INSURANCE FOR ALBERTA

System of crop insurance to offset the cycle of lean and fat years, which he said would always continue, was advocated by Hon. F. S. Grisdale, the newly-appointed minister of agriculture, addressing a meeting of the seven constituent members of the U.F.A.

Dealing with economic conditions, Mr. Grisdale stated that tax collections had fallen off to the extent that the province had only one-third of the amount available six years ago.

ALBERTA WILL CONTINUE AID ON OLD SCALE

EDMONTON—Despite the fact that the Dominion government, in its extension of the "memorandum of understanding" agreement, insofar as it effects direct relief, has reduced its contribution from one-third to one-quarter, the province will continue to pay one-third of the cost, according to Premier R. G. Reid. The agreement has been signed to August 15. If the cities continue to pay their one-third the net reduction to the recipient will not be large.

The heads of the relief movement are of the opinion that the province will continue to pay in the same ratio as the Dominion, "since the Dominion has reduced its contribution without sufficient warrant, the province has decided to continue its one-third, thus keeping up to the scale of its contribution as provided in the advisory committee's report."

TENNIS NOTES

MEN'S JUNIOR INTER-CLUB TENNIS COMPETITION

In the District No. 5, Men's Junior Inter-Club competition, Three Hills defeated Carbon B by five sets to love. Carbon A defeated Carbon B 5-0. The following are the results and the scores:

Ringle-L. Bowhay, Three Hills, defeated P. Paxon, Carbon B, 6-0, 6-0, 6-0. R. Murray, Three Hills, defeated R. LeMay, Carbon B, 6-3, 6-2.

Doubles—G. Jellous and R. Murray, Three Hills, defeated P. Paxon and R. LeMay, Carbon B, 6-3, 6-2, 6-0. Jellous and M. Hollomquist, Three Hills, defeated R. LeMay and W. Ollphant, Carbon B, 6-1, 6-0, 6-0. Jellous and M. Hollomquist, Three Hills, defeated R. LeMay and W. Ollphant, Carbon B, 6-1, 6-0.

Carbon "A" Defeats Carbon "B"

Singles—R. Wile, Carbon A, defeated P. Paxon, Carbon B, 6-0, 6-0, 6-0. N. Nash, Carbon A, defeated R. LeMay, Carbon B, 6-0, 6-0.

Doubles—R. Wile and W. Skerry, Carbon A, defeated P. Paxon and R. LeMay, Carbon B, 6-1, 6-0, 6-0. Nash and H. Wile, Carbon A, defeated R. LeMay and W. Ollphant, Carbon B, 6-1, 6-1. W. Skerry and H. Wile, Carbon A, defeated R. LeMay and W. Ollphant, Carbon B, 6-1, 6-0.

"Fresh from the Gardens"

Economic News In Fashion

Predictably, organizations throughout the country pass resolutions deprecating the treatment of certain news by the public press, but, as a rule, these are ill-adviced (however fine the motive behind them) for the simple reason that the press itself is the finest barometer of public opinion. News-papers could not survive did they not interpret aright the desires of the public to which they cater; they could not exist as profit-making institutions were it not for the fact they keep a wary finger on the flickering pulse of the public to give the public what it wants.

Thus it is his first visit to Europe and he will bring over an entourage of 300 people, which includes thirty-five of his wives, who enjoy the title of senior Begums. They will be strictly in purdah, so no white man can look on their faces.

No body knows the extent of the colossal wealth of the Nizam. Fantastic stories are current that the entire vaults of his palace extending for nearly two miles are filled with gold and silver bullion.

He rules over the millions of his subjects with a first autocrat's hand, which has more than once invoked the interference of the Viceroy of India. Shortly after war some point in his administration was not satisfactory to the Vice-regal party and a white political official officer was sent along to Hyderabad to "advise and assist." This greatly incensed the Nizam.

Then something apparently went wrong on the Indian money market. Huge waves of Indian bearer bonds were being thrown on to the market and minor panics were caused on the stock exchange of Bombay and Calcutta.

The government tried to buy the bonds but they stood fast. The Nizam, the seller of the bonds was discovered to be the Nizam's broker.

There were lastly consultations between the Viceroy and the Nizam. The stock markets ceased to function and the Nizam's political adviser to the state of Hyderabad was called away to undertake less desirable duties.

That little trouble over the Nizam back visited ten million dollars.

His first visit to London is to "render homage" and pay his respects to King George. He will be accorded sovereign honors, such as the Order of the Garter, and, of course, guards lining the route from the station to the hotel and one of the King's sons at the station to meet him. In fact, everything will be done on the kingly scale to placate this very important potentate who can make himself a powerful nuisance to the "salubrious" than a dozen naked Ghandis.

Rents Whole Hotel

Wealthiest Man in World Paying Visit To England

The richest man in the world is shortly to pay a visit to London.

He is not an accidental magnate but a mighty Indian potentate, ruling over a state as large as England. He is His Highness the Nizam of Hyderabad.

Thus it is his first visit to Europe and he will bring over an entourage of 300 people, which includes thirty-five of his wives, who enjoy the title of senior Begums. They will be strictly in purdah, so no white man can look on their faces.

Rung By Radio Signal

Admiral Byrd Flashed Sign To Liberty Bell July 4

America's first radio signal to the Republic, the liberty bell in Independence Hall, Philadelphia, was rung by a radio signal from Admiral Byrd aboard the Independence Day ship.

The signal was sent from the Antarctic over the V.A.M.C. Columbia network, July 4.

The permission to ring the bell was obtained from Mayor J. Hampton Moore of Philadelphia, who spoke during the broadcast. Byrd situated at his lonely advance base 123 miles south of expedition headquarters.

He flashed a signal to Independence Hall, Engineers of WCAU, CBS station in Philadelphia, arranged to "free" the electrical impulse to a hammer which struck the liberty bell. Its tone was heard not only throughout the United States and Canada, but also in Little America.

Correct English

Should Take Pride In Preservation Of Fur Seal On Kangaroo Island

The person who speaks correctly to-day, or writes what is called "good English," is speaking or writing in the manner of Addison and Pitt and Macaulay and Gladstone and other great masters of the language. It is the fact in the present that we meet new wants arising out of our evolutionary progress, and there are many technical terms in common use that Pitt wouldn't have understood.

But basically our English is their English, and we should take a decent pride in the fact in the preservation of a magnificent asset and the maintenance of a splendid tradition—Ottawa Journal.

Must Wear Moustache

Budapest is going to have constant moustache police in order to have been issued by the chief of police that all mounted policemen must now wear a moustache.

It is considered not only conducive to military appearance and bearing, but in line with the national tradition of the dashing Magyar horseman.

Colonization Finance Corporation

W. C. McKillop, Former Dean Of Manitoba Agricultural College, Appointed Farm Manager

At Indian Head

T. O. F. Herd, General Manager, of the Colonization Finance Corporation of Canada, Limited, has appointed W. C. McKillop, former Dean of the Manitoba Agricultural College, as farm manager for the Indian Head zone of the Dominion.

Mr. McKillop, who has accepted the appointment of Field Crops Commissioner for the province of Alberta, Mr. McKillop is taking up his duties immediately and brings to his new position of farm manager, a wealth of agricultural training and practical knowledge, and experience of many years as superintendent of the Dominion Experimental farm at Brandon, as well as dean of the Agricultural College.

Mr. McKillop was born on August 23rd, 1882, in Glenary County, Ontario, of Scotch parentage, and was raised on the farm of his father who was well known in Eastern Ontario as a successful farmer. He has been in the Dominion since 1913, when he came to the Dominion to take up his duties as representative of the Seed Branch of the Dominion Department of Agriculture.

He started a seed testing laboratory in Calgary and was instrumental in preparing grasshopper mixtures in Saskatchewan has been considered inferiorly higher than last year, some 3,400 tons of ammonium sulphate and 1,700 tons of triple superphosphate having been sold. Most of the fertilizer went into the territory east and north of Regina and north of the Red River.

Agricultural Notes

Many Items Of Interest To The Western Farmer

Budan grass is being grown more extensively this year for pasture purposes in the St. Lawrence counties of Eastern Ontario.

Commercial canning is one of the oldest of the larger organized industries in the Dominion. The first canning establishment was established at Grimsby, Ontario, in 1878.

Seed cleaning operators in British Columbia state that, owing to the general low viability of the timothy seed cleaned this year, much more seed was blown out in cleaning than in previous years, in order to improve the germination.

A saving of thousands of dollars in preparing grasshopper mixtures in Alberta has been effected by the pulverization of the sawdust used, on the recommendations of the Dominion Seed Branch inspectors, thereby resulting in the use of only 20 per cent. of bran instead of 50 per cent.

Under the amended regulations of the Dairy Industries Act, a dairy producer may refuse to grant a dairy producer or his agent, in his judgment is of either too high a temperature or too low a temperature to permit proper examination, until the temperature of the milk cheese or butter is brought within a satisfactory range.

The sale of commercial fertilizers in Saskatchewan has been considered inferiorly higher than last year, some 3,400 tons of ammonium sulphate and 1,700 tons of triple superphosphate having been sold. Most of the fertilizer went into the territory east and north of Regina and north of the Red River.

New X-Ray Device

Possible For Doctors Miles Away To Examine Patient

A new X-ray observation device, revealing the anatomy of the least substantial body organs and even the blood vessels in their natural color, has been perfected and patented by Luther G. Simjian, former director of the photographic department of the Yale Medical School, it has been announced.

Mr. Simjian's apparatus not only will show the structure and density of bony organs but that appear on present X-ray plates as dim shadowy forms, but lessens existing hazards to the subject being examined. Moreover, by a system of telegraphic wiring between hospitals, it will be possible for a patient to have an X-ray tube in one clinic while the image of his internal organs is reproduced for specialists in another clinic hundreds of miles away, or in any number of clinics at the same time.

Superiorly, Mr. Simjian's invention resembles the familiar X-ray fluorescent screen which reflects the sharp shadow thrown by the subject as he sits between the source of the rays and the screen. In this shadow, dense objects, such as bones, appear almost black, while tissues of less weight fade into lighter tints of gray. Invariably the diagnostician must induce in guesswork as he strains to distinguish faint lines of shading.

When the physician desires to peer further into the secrets of a particular organ, such as the heart, he must increase the intensity of the X-rays.

When the physician desires to peer further into the secrets of a particular organ, such as the heart, he must increase the intensity of the X-rays.

TOWN & COUNTY
Personalographs

Mr. and Mrs. J. Sellens of Calgary
 were Carbon visitors this week, at-
 tending the wedding of their son, Ed-
 mond.

Mr. and Mrs. Cyril Stephens returned
 on Friday from a week's honeymoon
 at Banff.

Mr. and Mrs. K. J. Charvet and fam-
 ily returned on Sunday from a ten
 days holiday at Banff.

Miss Irene Noah, Mrs. H. T. Wilson
 and Mrs. W. Poxon returned on
 Drumheller on Friday.

Mrs. J. J. Gosselin entertained on
 Friday evening in honor of her guest
 Mrs. J. O. Lefebvre, a one-time resi-
 dent of Carbon.

Mr. and Mrs. MacPherson and family
 have been spending a holiday at Banff.

The young people held a chaperon
 on Friday evening at the home of Mr.
 and Mrs. Cyril Stephens, and the young
 couple were officially welcomed on their
 way into the realm of married life.

Mr. and Mrs. W. Poxon spent Sun-
 day at Pine Lake.

Remember! When the next print-
 ing exigencies will be your office
 and ask you for a printing order, tell
 him that there is a printer in town and
 that he CAN do that particular job.

PUT HIM WHERE HE BELONGS

If there is no breeding place for the
 fly there will be no flies. The almost
 total disappearance of flies from
 office has removed a positive source
 of propagation. But not all the
 spots which cause the fly in procre-
 ating the vicious pest in the vicinity of
 the office. Where there is still there will
 be flies and where there are there will
 be some of the little verminous, trans-
 mitters of disease. They are not to be
 considered as an inevitable annoyance without
 consideration of the manner in which
 they are bred. They are not to be
 considered as an effort was made to eradicate
 them. That era is past but there are
 those still who tolerate conditions
 which in effect are not inimical to the
 interests of the fly. Not every human
 complaint can prevent him from work,
 but entrance into verminous and harm-
 ful on the outside. It is within the
 province of all to refuse to purchase
 food products which are verminous in
 flies.

Were everyone to eliminate breed-
 ing places on his own premises and
 in season and need, the fly would soon
 become extinct. The fly is small but
 he makes up in industry and persis-
 tence what he lacks in size. We become
 alarmed when an epidemic threatens
 yet too many of us tolerate the fly
 when we know his capacity as a dis-
 ease carrier. Because he is so common
 we minimize the pest which he trans-
 mits.

THEY ALL DO IT

A hat is not supposed to have much
 common sense or tact.
 Yet every time she looks at you she
 catches forth the fact.
 The watchful look, and grudging
 quick, and drowsy and phlegm one.
 The peacock reveals his tail and
 squawks, also squalid and obscene one.
 And even secretaries know enough to
 hiss before they sniff.
 Not more, the greatest masterpiece
 that Nature could devise.
 Will often stop and hesitate before
 he'll advertise.

Mr. and Mrs. E. J. Boulton and fam-
 ily, and Mr. and Mrs. H. T. Davidson
 leave today for a few days' holi-
 day at the former's home at Kasha, B.
 C.

Mr. and Mrs. Sam Clayton and daugh-
 ter of Lonsdale, spent Sunday vi-
 siting with Mr. and Mrs. Fred Mc-
 Cracken.

Mr. and Mrs. Adam Bertsch and fam-
 ily motored to Drumheller on Sun-
 day.

The Chronicle office will be closed
 next week. When it opens on August
 6th we hope that it will be with a rush
 of delinquent subscribers who demand
 that they be allowed to pay their subscrip-
 tion arrears.

John Lefebvre and his cousin, Dr.
 Lefebvre of Lethbridge, were in town on
 Thursday last, looking over the local
 coal mines.

Fred Poxon, and W. H. T. Olive, res-
 pectively, are having the front part of
 their local business places painted.

Otto Becker arrived from California
 this week. He has been distributing
 some of the American "Tom dollars"
 for which we are thankful.

Let Us Do Your
Printing?

All business houses need more or less printed matter, all of which
 is within the possibilities of the local printer. Yet how prone
 many are to pass up the home printer and let the orders go to
 city offices which have no interest whatever in rural communities
 except to get printing orders and the cash to pay for them. Busi-
 ness men, remember that the home paper is constantly promot-
 ing the interests of the home community and you owe it to your-
 self and your local paper to back up these efforts by at least hav-
 ing your printed matter done locally.
